EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony Sitko on April 12, 2007.

The application has been amended as follows:

In claim 1, line 23, before "and", "shell" has been changed to -housing--.

In claim 10, line 1, after "backplate", --assembly comprising a-- has been inserted.

Claims 11-20 have been canceled.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

None of prior art teaches an electret microphone that comprises a housing having an acoustic port, a diaphragm assembly, an insulating spacer, a backplate assembly, a body assembly, a conductive mount and a printed circuit board, as specifically constructed in claim 1, wherein the backplate assembly includes a protrusion radially extending from an outer circumference, the first end of the conductive mount is disposed into the hollow portion of the body assembly for electrically coupling with the backplate assembly, whereby an acoustic passage is formed at the sides of the protrusion between an inner circumferential of the housing and the outer circumference of the backplate assembly, the acoustic passage allowing air flow

created by movement of the diaphragm responsive to acoustic energy coupled into the acoustic port.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Murphy (U.S. patent 7,136,500) teaches a backplate assembly for an electret transducer.
